

General Description

- Brammo Inc. received investment funding 11/08 to start producing and selling the Enertia electric motorcycle,
 - A brand new product with anticipated great market potential
- Brammo faced the daunting task of developing a production process capable of meeting demand as early as 3/09 with little infrastructure or internal capabilities to support manufacturing

Scope

- Transition from EBOM in PDM through MBOM and release of sales orders
- Back-office solutions implementation (PFEP, QAD integration, inventory and warehouse management)
- Material handling strategies, part traceability issues
- Supplier Development including First Article Submissions
- Development of Lean Manufacturing Systems
- Set up lean manufacturing environment with Continuous Improvement as a key objective

Success

Implement PFEP and QAD Rollout
Reducing inventory by 40% and downtime
by more than 60%
